Mowe, *Ogun State*

Summary

Hi! I'm Opia Favour, a passionate React developer with a knack for creating dynamic and responsive web applications with 4 years of coding experience. I enjoy turning complex problems into simple, beautiful, and intuitive designs with extensive experience in building responsive and interactive web applications. Proficient in JavaScript and frontend technologies, with a strong ability to translate client requirements into innovative and functional digital solutions. Adept at working in agile environments and committed to continuous learning and professional growth.

Education

Hallmark University
B.Sc Computer Science (currently studying)

Skills

- **Frontend Development:** ReactJS, NextJS, TypeScript, HTML5, CSS3, Tailwind CSS, JavaScript(ES6+)
- **State Management:** Redux, Context API
- **API Management:** RESTful API, Axios
- **Backend Development:** Node.js, Express.js
- **Database Management:** MongoDB
- **Cloud Services:** AWS, Firebase
- **DevOps:** Docker
- **Testing:** Jest
- **UI/UX Design:** Figma
- **Performance Optimization:** Web performance best practices
- **Security:** Web application security principles
- **Version Control Systems:** Git, GitHub, GitLab
- **Soft Skills:** Communication, Problem-Solving, Collaboration, Leadership, Time Management

Projects:

1) PINCIAL - *A Picture Sharing Social Media App*

Skill: React, Tailwind, Sanity.io, Google OAuth

- Implemented New Features: Added conditional logic, data filters, and content management.
- Frontend Development: Built the frontend using ReactJS, Tailwind CSS, and Sanity.io for content management.
- User Authentication: Integrated Google OAuth for secure user login.
- Search and Filter: Developed advanced search and filter options for images.
- CRUD Operations: Implemented Create, Read, Update, and Delete functionalities, allowing users to make posts, save images, and delete content.

2) NEWSREEL - *A News Application*
Skills: React, Tailwind CSS, Restful APIs, Context API

- Application Development: Built a news app that fetches current news from around the world using React.
- API Integration: Integrated News API to deliver real-time content.
- User Experience: Implemented state management and features like dark mode/light mode toggling to enhance user experience.
- Deployment: Successfully deployed the application, making it accessible to users globally.

3) E-Commerce Store
Skills: React, Tailwind CSS, Google OAuth, Redux, Stripe

- Modern Tech Stack: Developed the site using ReactJS, Tailwind CSS, and Stripe for payment processing.
- Comprehensive Features: Built a feature-rich e-commerce platform with a product catalog, shopping cart, and user authentication.
- Responsive Design: Ensured the site is fully responsive and optimized for various devices.
- Best Practices: Followed best practices in responsive design and version control using Git.

4) Health Care Application:
Skills: NextJS, Appwrite, Tailwind CSS
- Built using NextJS, a React framework, and Appwrite for database management.
- Provides user login functionality, the ability for users to schedule meetings with doctors
- Administration Privileges for Doctors to view appointments, cancel appointments, accept appointments

- Highlights capability to build complex applications focused on user experience and administrative efficiency.

5) E-commerce Store:
Skills: with NextJS, Redux, Tailwind CSS, Google OAuth, Redux, Stripe

- Modern Tech Stack: Developed the site using NextJS, Tailwind CSS, and Stripe for payment processing.
- Comprehensive Features: Built a feature-rich e-commerce platform with a product catalog, shopping cart, and user authentication.
- Responsive Design: Ensured the site is fully responsive and optimized for various devices.
- Best Practices: Followed best practices in responsive design and version control using Git.
